

Program Executive Office for Manpower, Logistics and Business Solutions

Who We Are

The Program Executive Office for Manpower, Logistics and Business Solutions (PEO MLB) is the Department of the Navy's (DON) manpower, logistics and business solutions information technology (IT) acquisition agent. The systems and solutions PEO MLB develops, acquires and delivers are the backbone enabling the DON's day-to-day administrative, business and financial operations. PEO MLB provides Sailors, Marines, DON civilians and their support systems with the services needed to complete their missions and tools to manage their careers.

PEO MLB is a modern service delivery organization aligned around capability portfolios. This structure allows for a customer-focused, holistic approach to doing business by increasing efficiency, reducing duplication and improving collaboration. PEO MLB has three service portfolios: Enterprise Application Services (EAS), Data Transformation Services (DaTS) and Enterprise Systems and Services (E2S) & Innovation Support Services (ISS).

PEO MLB was established in May 2020, following the disestablishment of the Program Executive Office for Enterprise Information Systems (PEO EIS), to realize the DON's vision of digital transformation by optimizing program alignment across the Navy and Marine Corps capability portfolios and enabling more agile delivery of IT capabilities to a complex and diverse set of customers.

Value to the DON

- Optimizing and increasing the agile delivery of IT services by consolidating manpower, logistics and business solutions across the Navy and Marine Corps portfolios under a single organization
- Delivering economies of scale by rationalizing services and using portfolio management in a capability-based organization
- Providing accurate financial information to support decisions, financial auditability and compliance regulations
- Automating supply chain management platforms that provide Commanders with near real-time status on supply, maintenance and service requests
- Developing cost-efficient applications based on agile methodology and open source technologies to maximize the return on investment
- Standardizing data architecture across Department of Defense information domains
- Utilizing the cloud, commercial off-the-shelf (COTS) and other non-developmental solutions to reduce life cycle sustainment costs

Program Executive Office for Manpower, Logistics and Business Solutions

Our Portfolio

Enterprise Application Services

Enterprise Application Services (**EAS**) delivers the DON's day-to-day human resources, financial and business systems functions and the tactical applications that provide direct support to Sailors and Marines such as communications and logistics supply systems.

EAS is comprised of five service areas:

- **MyNavy HR IT Solutions Services**
Formerly known as the Sea Warrior Program, MyNavy HR IT Solutions Services, is the acquisition agent responsible for the Navy's HR IT modernization. MyNavy HR IT Solutions manages a large services portfolio of business applications, systems and initiatives delivering critical capabilities to our active and Reserve forces, civilians, retirees and Navy families 24/7 around the world.
- **Navy ERP Financial IT Services**
Formerly known as Navy Enterprise Business Solutions, Navy ERP Financial IT Services delivers IT solutions that provide the DON with business tools and capabilities used to align and manage the Navy's money, manpower and materials.
- **Logistics (LOG) IT Services**
Logistics (LOG) IT Services was added to the PEO MLB portfolio in October 2020 as part of the DON's effort to realign common LOG IT programs, projects and systems under a single Naval organization. LOG IT is responsible for leading the Naval Logistics IT Digital Transformation efforts to provide the required IT services to keep naval platforms and weapons systems operationally available by optimizing and modernizing more than 200 legacy LOG IT systems.
- **Marine Corps Logistics Integration Information Solutions (LI2S) Services**
Marine Corps Logistics Integration Information Solutions (LI2S) Services is a family of systems that provides a deployable, single point of entry for logistics requirements, enabling technology in support of logistics operations while modernizing aged logistics processes and procedures.
- **Marine Corps Applications (APPS) Services**
Marine Corps Applications (APPS) Services was added to the PEO MLB portfolio in October 2020 as part of the transition of the Marine Corps Systems Command's (MCSC) sustainment and training applications under a single Naval organization. APPS develops and sustains modern and innovative IT software solutions by leveraging the latest technologies and processes to meet the changing environment and needs of the Marine warfighter.

Program Executive Office for Manpower, Logistics and Business Solutions

Data Transformation Services

Data Transformation Services (DaTS) is a new capability offering for the Navy. With data's growing importance to the Department of Defense (DoD) and the DON, PEO MLB was asked to enable the way the DON accesses, utilizes and shares data. DaTS provides services and products to align, normalize, rationalize and operationalize more than 1,500 disparate data sources through data governance, data services, data architecture and data science. DaTS is focused on providing the DON enterprise level, data services across nine of the 12 DoD information domains.

Enterprise Systems & Service & Innovation Support Services

Enterprise Systems & Service (E2S) & Innovation Support Services (ISS) is a new capability offering for the Navy. E2S is an original PEO MLB capability that provides support for enterprise business systems, fleet systems and enterprise systems by leveraging best practices of an adaptive acquisition framework to deliver capabilities rapidly to customers. E2S is tasked with leading PEO MLB's ISS efforts. The goal of ISS is to scale innovation in response to the DON's need to rapidly build, integrate and deploy new systems. E2S & ISS is charged with maximizing the customer experience while driving agile capability delivery that keeps pace with digital technology through innovation.
